

Nokia is pleased to announce the new Nokia IP690 security platform. Nokia IP690 is a complement to the current product range of Nokia IP Security Platforms.

Product Description

Nokia IP690 is purpose-built to run the Check Point VPN-1 Pro and VPN-1 UTM network security applications. It is optimized to provide consistent in-line reliability, ease of management and simple acquisition and implementation. This highly versatile 1RU platform is designed for growing medium to large businesses, large branch offices and internal network segments. It features robust price to performance value, port-density, and multi-Gigabit Ethernet performance. In addition, the Nokia IP690 is designed to enable performance improvements in the future through software and optional Network Interface Card (NIC) upgrades (sold separately), instead of more costly appliance upgrades.

Base Configurations:

Flash Based System

- 4-GB Compact Flash
- 2-GB DRAM
- Dual (2) Hot-Swappable Power Supplies
- Nokia encryption accelerator card

Hard Disk Drive Based System

- 128-Mb Compact Flash
- 2-GB DRAM
- Dual (2) Hot-Swappable Power Supplies
- Nokia encryption accelerator card
- 40-GB Hard Disk Drive (optional second HDD, sold separately)

Nokia IP690 is backed by Nokia's world-class First Call - Final Resolution global support and services.

Note: Nokia IP690 supports Nokia IPSO version 4.2 or later.

Product Availability

- **Orders:** Nokia IP690 will be on the price list and orderable on May 1, 2007
- **Shipments:** Nokia expects that Nokia IP690 will be available for shipment in mid-May 2007.
- **Channel Partners:** This new platform may be purchased and resold by Nokia for Business Expert and Authorized Channel Partners in the Americas.
- **Country Availability:** Nokia IP690 will be available everywhere it is approved. Please refer to the Country Availability Matrix in the Price List for availability.
