

BLUE COAT CERTIFIED PACKETSHAPER PROFESSIONAL (BCC-006) (BCPSP) 3 DAYS

Overview

The *Blue Coat Certified PacketShaper Professional* course is the second level of training on the PacketShaper. This is the rebranded and modified version of the former Packeteer Advanced Traffic Analysis and troubleshooting (Level2) course. The goal of this course is to help develop skills necessary to properly install, operate and configure PacketShaper. The course also aims to use reporting features and take appropriate action using PacketShaper control mechanisms to optimize network and application performance.

Pre-Requisites

- BCPSA course
- Understanding of networking and general knowledge of application behavior on Wide Area Network.

Target Audience

- Students who are responsible for troubleshooting network application performance using Blue Coat Packetshaper appliances.

Course Objectives

The BCPSP Course is intended for students who want to use new PacketShaper features that deliver integrated visibility, control and compression capabilities in a single appliance.

It covers:

- Blue Coat PacketShaper Architecture
- Advanced Classification
- Advanced Bandwidth Management
- Understanding Adaptive Response
- PacketShaper Authentication
- Compression and Acceleration
- Introduction to Intelligence Center

(Version 1.0 December 2009)
