

## RSA SECURID CERTIFIED ADMINISTRATOR (RSA-001) (RSA: ADMIN) – 2 DAYS

### Overview

This course provides an overview of the administrative responsibilities associated with RSA SecurID products. The working principles behind RSA Authentication Manager (RSA ACE/Server®), RSA Authentication Agents (RSA ACE/Agent®), and RSA SecurID hardware and software tokens are discussed, including product architecture, time synchronization, system maintenance, reporting functions, use of the RSA SecurID Quick Admin feature and RSA SecurID Web Express. Extensive hands-on exercises reinforce the administrative tasks involved in managing a user population and assigning and managing RSA SecurID tokens.

### Pre-Requisites

- Functional knowledge of Operating System and Networking fundamentals
- Familiarity with UNIX and/or Windows system and user administration

### Target Audience

- Help Desk or End User administrators who are responsible for administering and supporting users and/or day-to-day system management of this product.
- System Engineers or other information security professionals who plan to attend the companion Installation/Configuration course

### Course Objectives

- Understand the use of RSA SecurID Web Express for deployments
- Use RSA SecurID Quick Admin functionality
- Know how to set up and use the software authenticators
- Understand the ongoing maintenance requirements
- Perform report functions and user troubleshooting
- Perform appropriate administrative functions and populate a database
- Describe the configuration required for operations
- Understand the basic product architecture and theory of operation

*(Version 1.0. October 2007)*
